Search Security Groups

Security groups provide an efficient way to assign access to the resources in ICM. .

Security groups allow you to:

- Assign the appropriate user rights to security groups in the Active Directory
- Assign permissions to security groups for resources

In ICM, you can create and edit a group of users and assign specific privileges to the group. You can also provide **view** and **manage** privileges to various entities in ICM.

To Search a Security Group: .

- 1. On the ICM Homepage, click Admin.
- 2. On the Organization Details page, click Security Groups.
- 3. On the **Security Groups** page, under **Search For,** select the appropriate item. This will display the search results relevant to the item you selected with a number in the brackets. The number in the brackets denotes the search items relevant to the search item you entered.
